

ezTimeSheet Makes it Simple For Small Businesses to Track Employee Time and Attendance

ezTimeSheet, the easy-to-use employee time and attendance software, saves time and reduces costs for small to mid-sized businesses. The 10-user version is free and available for download from halfpricesoft.com

As a business owner, there are few things more valuable than a tool that puts more hours back into his day, simplifies his life, and saves his money that he can re-invest into his business. ezTimeSheet, the revolutionary new employee attendance and time tracking software, does all of that and more.

Most employee attendance software is so difficult to learn that it's best left to IT professionals. The ezTimeSheet difference is in its simplicity. "You don't need to be a computer guru to use it," promises Dr. Ge, founder and president of Halfpricesoft. "Even if you've never worked with time sheet software before, you'll be an expert with your first

use. There's no frustrating learning curve because the program is intuitive; everything makes perfect sense."

ezTimeSheet, the employee attendance and time tracking software, was developed in response to the many requests flooding in from the company's current small- and mid-sized business owner customers. They wanted time and attendance tracking software that got the job done quickly and easily, and that's what Halfpricesoft delivered. Among the many benefits of ezTimeSheet:

- It reduces payroll costs. Due to overlapping time clock entries, the average employer overpay is 2.5%. ezTimeSheet eliminates this problem.
- It saves time. The program calculates time and gross pay automatically, preventing the need for owners or administrators to complete the task.
- It adds value. You can use the employee attendance data for business analysis, including scheduling and other essential day-to-day functions.

The best part is that user is able to get this software for **FREE**

There's absolutely no risk to try ezTimeSheet. The one-employee or one-administrator version is completely free to download. If you're happy with the product, you can add additional users for incredibly low costs—beginning at \$39! And user can even get 10-user license key for FREE by checking out through TrialPay.

ezTimeSheet is the latest software release from Halfpricesoft, an industry leader known for creating small business software such as check printing and barcode generating tools that are both highly beneficial and ultra-simple to use. "We know what it's like to run a business and how important every second of your day is," Ge says. "We're extremely proud to add ezTimeSheet to our suite of products, and we're so confident that ezTimeSheet will simplify your life that we're letting customers try it for free. You've got nothing to lose and a significant amount of time and money to gain!"
